

New W.EASY 1.4.0 software update from WABCOWÜRTH launched

Künzelsau, July 28st 2011 - It's ready - Künzelsau diagnostics specialist WABCOWÜRTH is launching a new 1.4.0 software update for all its W.EASY multi-brand diagnostics solutions.

This should please customers old and new, since the company has not skimped on innovations: One highlight worth mentioning is the ECU change in the following trailer systems: Haldex EB+, Knorr TEBS gen.1 / gen. 2 and Knorr KB4TA. The ECU change will be an enormous help for workshops in everyday tasks. It is particularly worth noting that the ECU change has been produced very close to OE requirements. This is indicative of WABCO's proximity and expertise.

One software enhancement of note is the new functionality and technical data available for seven IVECO models and the Allison transmission. Workshops also have the option of using a network-compatible customer database with fleet management, available immediately. Hence users can manage customers and their vehicles in the workshop, plus operate an electronic vehicle record for each vehicle.

Another innovation is a service billing module. This enables cost projections, orders, invoices and supplier orders to be generated. Installation of the W.EASY "Labour Rates" software package is a prerequisite for this. Labour Rates are fully integrated into all W.EASY Premium versions. Labour Rates are available as an option in all other product versions.

The W.EASY update can be easily downloaded via the online update function in the W.EASY software. Alternatively WABCOWÜRTH can provide update DVDs.

W.EASY is developed with the aim of simplifying work in the workshop, to offset the ever more complex repair requirements.

W.EASY software can be used to cover a total of 736 vehicle models from 74 manufacturers. This coverage is continually being expanded, so that the system is always completely up-to-date.

Customer supply and consultation is guaranteed by our current team of 11 field sales representatives and global network of sales partners.

About WABCOWÜRTH
