

W.EASY CONNECT
available now

**IF YOU HAVE TO TACKLE BIG TASKS,
YOU NEED TO BE ABLE TO RELY
ON YOUR EQUIPMENT.**

MAKE THINGS WORK

W.EASY CONNECT IS THE CENTREPIECE OF OUR DIAGNOSTIC SOLUTIONS

The modern multi-brand interface establishes simple and secure connections between the vehicle and the software. Compact and powerful, W.EASY CONNECT ensures the smooth flow of data in future-orientated commercial vehicle workshops.

Multi-coloured 360°LED ring

Immediate visualisation of the current communication status, similar to the icons on the back

Flexible 3-in-1 solution

Whether via WLAN, Bluetooth v. 4.2 or the latest USB-C, W.EASY CONNECT always connects

Robust & compact design

Perfect for workshop use thanks to its lightweight, compact design and non-slip surface

DoIP & CAN FD

Ready for future communication protocols. For a fast and secure data flow without an adapter

PassThru J2534

Enables the use of OE software without additional hardware (VW, Mercedes etc.)

Integrated flight recorder

Mobile data recording at the touch of a button for advanced fault diagnostics

Technical details

Dimensions: 135 x 89 x 31 mm
Operating temperature: -20 to +40°C
Voltage: 6 to 36 V

OBD connector with LED light

For easy location of the OBD port. Quick & easy replacement of the 2.90 m long cable possible

Ready for the future

W.EASY CONNECT opens up access to modern online diagnostic solutions. It is also already possible to diagnose the first electric and hybrid commercial vehicles.

Vehicle coverage is constantly growing.

Exclusive access to ZF [pro]Diagnostics

W.EASY CONNECT seamlessly integrates the pioneering ZF [pro]Diagnostics for the first time. The interface enables new connections and prepares commercial vehicle workshops for the challenges of tomorrow.

Easy access to encrypted vehicles

W.EASY CONNECT offers access to protected commercial vehicles from various manufacturers via the WABCO WÜRTH Secure Gateway Portal. To ensure that it is future-proof, the manufacturer and vehicle coverage are constantly being expanded.

Versatile and compatible

W.EASY CONNECT is ideal for workshops with a mixed vehicle portfolio. A voltage range of 6–36 V enables diagnostics on heavy and light commercial vehicles as well as cars. Thanks to technical enhancements, WOW! car diagnostics is fully supported.

W.EASY SAFETY IN COMMERCIAL VEHICLES

YOUR MULTI-BRAND DIAGNOSTICS WITH INTEGRATED MANUFACTURER EXPERTISE

With the compact W.EASY CONNECT as a cross-brand diagnostic device for trucks, trailers, buses and vans and the modular W.EASY concept consisting of hardware and software components, you get a customised diagnostic solution. W.EASY CONNECT also forms the interface for calibrating driver assistance systems.

Only the W.EASY concept incorporates the original WABCO system diagnostics and the original Haldex trailer diagnostics in one system – without any additional device changes. This makes W.EASY multi-brand diagnostics from WABCO WÜRTH unique and easy to use. By using the W.EASY software, workshops continue to fulfil all requirements and standards to be a ZF [pro] Service Partner (formerly WABCO Service Partner).

WE ARE MANUFACTURERS. DEVELOPERS. INVENTORS.

We create solutions, both for our customers and with them. Our job: knowing exactly what's possible. Our motivation: wanting to know if we can do even more, even better. Quality inspires us and drives us on. With the synergy of inventive spirit and experience, we ensure the highest safety standards in commercial vehicles.

That means: Only after each individual model has been thoroughly tested do we make the W.EASY diagnostic data available to our customers.

Our aim is to make day-to-day work in the workshop easier, safer and even more efficient. The close cooperation with manufacturers and the integrated OE expertise of WABCO and Haldex support us in this. In this way, we guarantee the correct execution of sensitive calibration processes from the drive to the brakes and the lighting.

DIAGNOSTIC SOLUTIONS FOR THOSE WHO MAKE BIG THINGS HAPPEN 24/7

Extremely big, really tough and incredibly multifaceted – this not only describes commercial vehicles themselves, but also the tasks they have to perform. Every failure of a part costs time, money and, in the worst possible case, even lives. For around 15 years, WABCOWÜRTH has been providing workshops, fleet managers and a wide range of organisations with commercial vehicle diagnostics that can also cope with major challenges.
